

This device is the base unit of a 40-channel 2.4GHz cordless telephone. It provides connection to PSTN (Public Switched Telephone Network). The connection between base and handset unit employs 902 – 928 MHz and 2400 – 2483.5 MHz frequency bands. The base unit transmits 902 – 928 MHz frequency signal to handset unit. The handset unit transmits 2.4GHz frequency signal to base unit.

DIGITAL SECURITY SYSTEM□

□

The cordless phone uses a digital security system to provide protection against false ringing, □ unauthorized access, and charges to your phone line.□

□

When you place the handset in the base, the unit verifies its security code. After a power □ outage or battery replacement, you should place the handset in the base for about 20 □ seconds to reset the code.□
