Re: Referencing Test Data, KDB 484596

To Whom It May Concern:

Per the guidance given in Draft KDB 484596, Compliance Testing confirms the requirements outlined below in Section 3 have been met:

- (a) Introduction:
 - a. The certification being sought for SD 700 (FCC ID: GB8SD-700A) contains the same RF circuitry and hardware design as previously certified model SD 720 (FCC ID: GB8SD-720A).
- (b) Explain the Differences:
 - b. The only difference between SD-700 and SD 720 is that the SD-720 is capable of being both DC and AC powered but, SD-100 is only AC powered.

Please let us know if any further information is needed.

Sincerely,
