

LABEL ARTWORK

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Cautions

- Do not recharge Battery Pack if it is hot or warm to the touch. Allow Battery Pack to cool before recharging.
- Do not recharge a Battery Pack if it appears to be damaged or leaking
- Always unplug the Charger when not in use
- Always remove the Battery Pack from Battery Compartment when not in use.
- Do not dispose batteries in fire. Leakage, explosion and personal injury may occur.
- Dispose of Rechargeable Battery Pack properly.
- Do not attempt to disassemble Battery Pack or Charger.
- Only an adult should charge Batteries

Troubleshooting

90% of all difficulties experienced with radio controlled watercrafts are due to either weak batteries or batteries that have been installed incorrectly. When batteries become weak, the watercraft may not necessarily stop completely, however, watercraft may exhibit slow response, slow speed or erratic behavior.

Problem - Watercraft does not move, moves slowly or moves sporadically

- Make certain there is a fresh 9V alkaline battery in the Transmitter and that it has been installed in the correct position
- Has the battery pack been installed in the watercraft?
- Is the Battery Pack connector plugged firmly in place in the Battery Compartment?
- Are the metal contact tabs touching, rusty or dirty in the Transmitter?
- Make certain that both the transmitter and the watercraft ON/OFF switches are in the ON position

Problem - Watercraft exhibits reduced range from the transmitter

- Make certain there is no outside radio interference in your area. The best way to test this is to take the watercraft as far away from radio towers, electrical lines or tall buildings as possible. If the watercraft operates correctly in the new area, radio interference was the problem.

FCC CAUTION:

The manufacturer is not responsible for radio interference caused by unauthorized frequency modification to this equipment. Such modifications can void the user's authority to operate the equipment.
