2.4G Wireless Optical Mouse Users' Guide

Installation

1. Plug the receiver into a USB port on your computer.
2. Insert battery into the mouse.
3. This mouse provides factory default ID and so the link will be set up after a while.
4. Click the mouse key and her response will be read on the monitor.

Trouble Shooting

1. No connection between the mouse and the receiver.
   Re-insert the receiver. Try to insert receiver to another USB port on your computer.
2. No any response on the mouse.
   Take out the battery from the mouse and reinstall it with correct orientation. Try a new battery if necessary.

CAUTION:

Changes or modifications to this equipment not expressly approved by the manufacturer could void the users authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

FCC ID for the product: GKO-KWORLD-MR1XX

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.
