Attestation Statement – GL7NAIS-300

The Navico NAIS-300 is a class B AIS transponder with integrated user interface. The NAIS-300 is compliant with the international standard IEC62287 for class B-CS AIS transponders and is compliant to IEC60945 for EMC and environmental conditions. The NAIS-300 has passed USCG approval requirements.

This product is based on the Software Radio Technology transponder PCB, subject to FCC approval under the reference UYWSRT-MTB-OEM. This assembly is made under license by Navico and then integrated with the controller PCB in a common housing.

Navico understands that the FCC has not yet published rules for the approval of class B AIS under CFR47 part 80 and therefore requests that consideration is given to applying a waiver to this product pending the completion of the rulemaking process.

Best regards,

David Sheekey
