To whom it may concern,

The Radio listed in this application is fitted with channels as listed in CFR 47 part 80. In particular channels 2, 4, 60 and 62 are inhibited from use.

Control of channels is by a configuration file held within non volatile memory in the radio. This file may only be modified by external software run on a PC. This software is only made available to Simrad distribution and authorised technical dealers.

Yours Sincerely

David Sheekey
