Littleton, MA 02702

Gentlemen:

The purpose of the attached materials is for a Class II Permissive Change to add the Psion Teklogix Inc. (FRN: 0006929947) model 7530 G2 RA2041(new host model) to the Limited Modular approval of FCC ID: GM37535G2RA2041. In addition, this model must be added to the Canadian certification IC: 2739D-7535G241. The device uses a radio module which already has its own modular approval under FCC ID: TWG-SDCCF10G. The new host model uses the same antenna as the original model. This application includes the original test reports for the radio module, and spurious emission and SAR reports for the 7530 G2.

Sincerely,

Evan Gould  
EMC Engineer
