

296-May-03

Responses to ATCB Questions dated April 29, 2003.

17. All the listed accessories use the same jack plug connector and all the pins are wired. It is evident, that from SAR point of view all those accessories are identical.
18. CSM-6 consists of leather case and plastic clip, but it includes also small metal part, rivet, that attaches leather case and plastic clip together. The metal rivet will be removed and the carry case will be renamed. CSM-6 is taken out from the list of accessories designated for GMLRH-40. Please find updated UG in the upload.
