

We, declare that this EUT (FCC ID: **GSS-VS14006** ) doesn't have Ad Hoc Mode function on "non-US/Canada frequencies". In addition, the frequency selection feature is disabled by firmware for devices marketed to the US/Canada. For DTS part of this device, only channels 1~11 will be used in North America.

Should you have any questions or comments regarding this matter, please have my best attention.

Sincerely yours,

**ViewSonic Corporation**
