

Introduction

The 7A/9A platform design meet plug and play , display power saving rule and full range sync capability and with a universal power supply which can be offer world wide requirement . The working rang as :

1. AC input : 90 ~ 265 Vac 47 ~ 63Hz .
2. Horizontal frequency range : 30 ~ 95KHz .
Vertical frequency : range 50 ~ 150Hz .

The circuit block diagram show on Figure 1 .

FCC ID:GWG9AXX
