INDUSTRIAL CONTROLS

DATE: 1/20/2000

TO: FCC Application Processing Branch

FROM: Gerald Berger

PURPOSE: This Application Is To Add Emission Designator To Transmitter
FCC ID GXZ304E7651

We have re-tested the above transmitter using the 99% power bandwidth method as specified in the FCC's rules and regulations. Using this method we find the bandwidth to be 8.6khz. A plot of the test is attached. Rounding the 8.6khz to 9khz, to account for production variations, we would like to add the emission designator 9K00F1D to our transmitter approval ID GXZ304E7651.

Thank You

Gerald Berger
