**731 Confirmation No.:** EA102717  
**Correspondence Reference No.:** 21447  
**Request for Tech. Info.:** 12/07/01

Dear Andy:

Transmitted herewith, on behalf of Symbol Technologies, Inc., is an amendment provided in response to the request for technical information dated December 7, 2001.

1. Please find the attached 6 dB BW plots, Power Density plots, Out-of-band Conducted Emissions plots, and Band Edge plots.
2. Please find the attached processing gain report.
3. The Symbol SPS3046 Scan/LAN expansion sled was designed for use only with the Compaq iPAQ. The connector at the bottom of the Compaq iPAQ is proprietary to Compaq. The Symbol expansion sled connector mates with the Compaq connector. This will make it unlikely for it to be used with any other products. This product was developed with Compaq's consent and Compaq will be supporting the product.

We trust this information is sufficient to issue the grant as soon as possible. If you have any further questions, please do not hesitate to contact us.
