

Operation Description

Power:

Rated supply voltage: 1.5V

U3 (RT9261B33CB) is power management IC. U3 is the circuit of boost pressure, it make the voltage reach 3.3V to support the EUT working.

Main Processor:

U1(SN8P2722_SOP20) is MCU Control IC, mainly responsible for keys input and Laser and RF module output.

RF model:

U2 (A7325 QFN16) is RF model and send the wireless signal,

LASER:

D3 is a laser pointer
