Columbia, MD 21046

Limited Modular Approval:
FCC ID: HBW0266-2 for remote control transmitter 813LMX.

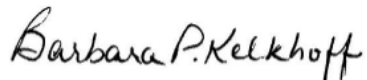

Letter of Changes

To whom it may concern,

We would like to submit for a new FCC ID: HBW0266-2 for our 3-button remote control transmitter model 813LMX. We are also submitting for FCC ID: HBW0266-1 for our single button remote control transmitter model 811LMX in a separate application. The PCB is identical for both boards, but 2 switches are de-populated on the single button 811LMX. These remote control transmitters are similar to our transmitters 811LM and 813LM in our FCC ID HBW7471 except we have added 3 new transmit frequencies. These new transmitters have the same E-dip code with a single triband output of 310, 315 and 390MHz set as the default setting. The transmitter can be programmed to only transmit our legacy C-dip code at either 315MHz or 390MHz.

We would appreciate your prompt attention to the submittal. If there are any questions, please call me at 630-993-6306 or send a fax to 630-516-6863.

Sincerely,

Barbara Kelkhoff
