

RF Exposure for HHP 7300:

The Device must be operated as stated in the user manual, according to the related operating and warning instructions:

„CAUTION: To comply with FCC RF exposure compliance requirements, a separation distance of at least 8 inches (20cm) must be maintained between the antenna of this device and all persons (excluding hands, wrists, feet and ankles), during normal operation.

This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

This device is not specified or designed for body-worn configurations. Use of any body-worn accessories may not ensure compliance with the FCC RF exposure guidelines.“

Because of the maximum peak output power of 100 mW the RF exposure compliance requirements can be ensured in this way.
