DTS-UNII Device Declaration Letter

We hav	om it may concern: ve declared below featu FCC ID: HD57800LG	red for FCC equipme	nt authorization,			
(1)	DFS Device ☐ Master , ☐ Client with Radar detection capability , ☐ Client without radar detection capability, ☐ N/A					
(2)	Active / Passive Scanning , Frequency Band (MHz) 2412-2462 5745-5825 5180-5240 5260-5320	Active Scanning (the device can transmit a probe (beacon)) Yes, No Yes, No Yes, No	passive scanning (where the device is can listen only with no probes) Yes, No Yes, No Yes, No Yes, No	Ad Hoc Mode or WIFI Direct capability Yes, No Yes, No Yes, No	Access point capability Yes, No Yes, No Yes, No	
5500-5700						
pls check below: A master device is defined as a device operating in a mode in which it has the capability to transmit without receiving an enabling signal. In this mode it is able to select a channel and initiate a network by sending enabling signals to other devices A client device is defined as a device operating in a mode in which the transmissions of the device are under control of the master. A device in client mode is not able to initiate a network.						
(5) For client devices that have software configuration control to operate in different modes (active scanning in some and passive scanning in others) in different bands (devices with multiple equipment classes or those that operate on non-DFS frequencies) or modular devices which configure the modes of operations through software, the application must provide software and operations description on how the software and / or hardware is implemented to ensure that proper operations modes can not be modified by end user or an installer. Apply, No Apply, (If apply, pls help to provide explanation on it was implement, and how software was controlled)
