

Honeywell Scanning and Mobility

9680 Old Bailes Road Fort Mill, SC 29707 USA

Date: October 26, 2011

## **DTS-UNII Device Declaration Letter**

To whom it may concern : We have declared below featured for FCC equipment authorization, Device FCC ID: HD599EXL00					
(1)	DFS Device Master , Client with Radar detection capability , Client without radar detection capability , N/A				
(2)	Active / Passive Scanning , adhoc mode access point capability				
	Frequency Band (MHz)	Active Scanning (the device can transmit a probe	passive scanning (where the device is can listen only with	Ad Hoc Mode or WIFI Direct capability	Access point capability
	2412-2462	(beacon))  X Yes , No	no probes) ☐ Yes , ☒ No	Yes , No	☐ Yes , ☐ No
	5745-5825	Yes, No	Yes, No	Yes , No	Yes , No
	5180-5240	Yes, No	Yes, No	Yes, No	Yes, No
	5260-5320	Yes , No	Yes , No	Yes, No	Yes , No
	5500-5700	☐ Yes , ⊠ No	🛚 Yes , 🗌 No	Yes , 🔀 No	☐ Yes , ⊠ No
		Yes , No	Yes , No	Yes , No	Yes , No
		Yes , No	Yes , No	Yes , No	Yes , No
(3) Country code selection ability - Yes , No If yes, pls explain how it was implemented : (pls also help to provide detail of options for each country selection)					
(4) Meet 15.202 requirement - ☑ Yes , ☐ No , pls check below : ☐ A master device is defined as a device operating in a mode in which it has the capability to transmit without receiving an enabling signal. In this mode it is able to select a channel and initiate a network by sending enabling					
signals to other devices					
A client device is defined as a device operating in a mode in which the transmissions of the device are under					
control of the master. A device in client mode is not able to initiate a network.					
(5) For client devices that have software configuration control to operate in different modes (active scanning in some and passive scanning in others) in different bands (devices with multiple equipment classes or those that operate on non-DFS frequencies) or modular devices which configure the modes of operations through software, the application must provide software and operations description on how the software and / or hardware is implemented to ensure that proper operations modes can not be modified by end user or an installer.  Apply, No Apply, (If apply, pls help to provide explanation on it was implement, and how software was controlled)
