RE: FCC ID: HEDWA6101BCC

Attention: Eric Lin

I have a few comments on this Application.

1. Please note that the block diagram of the system shows 802.11a/b. The 731 is only for 802.11b. The manual states that for the 802.11a is not available. Please also note that the schematics appear to indicate a fully functional 802.11a mini-PCI slot. Please explain why the mini-PCI slot is shown in the photos, in the block diagram and in the schematics. Is the 802.11a disabled? How, etc? If the slot is not disabled, how do you prevent insertion of an 802.11a miniPCI card?

A handwritten signature in black ink that reads "Dennis Ward".
