SUBJECT: Class II Permissive Change for FCC ID: **HLZAX201NG**

The intention of this application is to enable the modular FCC ID: **HLZAX201NG**, granted on 06/24/2019 to be integrated in Acer Notebook computer, Model: N20H4. Power reduced by firmware is applied for this host device as specified in the tune-up procedure exhibit.

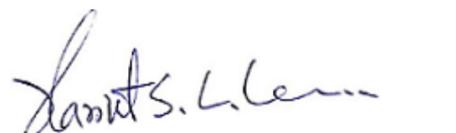

There are two Host samples tested to show compliance. They are:

SKU List	SKU1	SKU3
CPU	I5	I5
LPDDR4	4GB_Micron	8GB_Hynix
SSD	256GB_Samsung	512GB_Sandisk
Battery	MURATA_3Cell 48Wh	LGC_3Cell 50Wh
WLAN	Intel_AX 201	Intel_AX 201
Camera	Tech-Front HD	CHICONY HD

The module installed into host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: **HLZAX201NG** was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna of the same type but of lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary. Software security remains unchanged from the original application.

Except for the change above, the design, hardware and implementation are exactly same with original.

Sincerely yours,

Harriet Lee
