

## Declaration of Product Modification

2025-2-11

To Whom It May Concern

The purpose of this letter is to request Class II Permissive Change for:

FCC ID: HLZBE201NG

Original Grant Date: 12/13/2024 for DSS, DTS, NII, 6CD

The major change filed under this application is:

#1 Additional Chassis added, Acer Incorporated, Model Number: N25H5

#2 The antenna type is the same. The original application was certified with a 5.15 dBi. The C2PC is to add a lower gain 0.99 dBi for 2400MHz, 2.65 dBi for 5150~ 5250MHz, 2.65 dBi for 5250~5350 MHz, 1.84 dBi for 5470~5725 MHz, 1.72 dBi for 5725~5.850 MHz, 1.37 dBi for 5850~5895 MHz, 2.28 dBi for 5925~6425 MHz, 2.25 dBi for 6425~6525 MHz, 1.42 dBi for 6525~6875 MHz, 2.62 dBi for 6875~7125 MHz.

#3 Reduce the Output Power through firmware and it will be blocked via software. However, SAR measurement were evaluated. (Only reduce Wi-Fi Output Power, Bluetooth Output Power haven't changes).

#4 In this application, the host device enables the TAS (Time average SAR) function and applies the C2PC. However the host device does not support WIFI6E TAS function.

Please note that:

1. Software Security keeps the same as the original filing.
2. The WLAN TAS feature is enabled. The exact same WLAN authorized modules are reused in this PC with the exact same TAS algorithm validation methods for time averaging SAR as approved in KDB 968002.

Sincerely,

-----
