**Subject: Class II Permissive Change FCC ID: HN2-BTM311**

Dear Application Examiner:

Intermec Technologies Corporation with the assistance of Northwest EMC Inc. is submitting an application for a Class 2 Permissive Change for the BTM311 radio, FCC ID: HN2-BTM311, to approve a new RF exposure condition. The BTM311 radio is certified for limited modular approval in Intermec's CK61 computer and co-located with FCC ID: EHA802UIAG.

The new RF exposure configurations occur when the CK61 is docked in the cradle of the IP30. The IP30 is a pistol grip RFID scanner that contains radio modules IM4 and BTM4, FCC ID: EHAIM4 and FCC ID: EHA-BTM4 respectively.

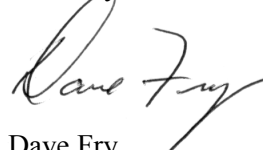

The IM4 and BTM4 were previously certified.

No changes have been made to the hardware or software of the radios in these co-located configurations. Co-located MPE estimates for mobile exposure conditions have been submitted. The exhibits submitted demonstrate compliance with FCC rules.

Your efforts in reviewing this application are greatly appreciated.

Please contact me by telephone at (319) 846-2415 or by e-mail ([Dave.Fry@Intermec.com](mailto:Dave.Fry@Intermec.com)) if there are questions or additional information needed concerning this request.

Sincerely,

A handwritten signature in black ink that reads "Dave Fry".

Dave Fry  
Sr. EMC Engineer
