To Whom It May Concern,

Subject: Instruction Manual for Honeywell Chimes and Push

Product Part Numbers:

51360SL, 51365SL, 51367SL, 51368SL, 51369SL, /51370SL, /51371SL

Regarding the fact that our instruction manuals do not list the product part numbers, I have included a matrix of products showing the List Number, packaging, manual, and rating labels to provide a clearer picture on their relationship. The label and packaging text may change slightly.

1) Each product carries a part number on the rating label, which is the identity of the product component used for the FCC and IC tests and approvals. The rating label is affixed to each product component and also carries the FCC and Industry Canada IDs.

2) The product List Numbers (aka Honeywell OS#) look like RCWLXXXX or RPWLXXXX. This number and the product photo are on our packaging and the user refers to this number to purchase the product.

Note: Different List Numbers represent different product combinations. (one product component or combination of product components, each individually approved.

3) An Instruction manual will be used for several product List Numbers in a respective series. These List numbers use various combinations of product components in the same family and will be shown, on the manual as, in this case, "Series RCWL35" or "Series RPWL35" as appropriate.

Sincerely,

Alan Bredon
