Date: December 30, 2015

The ERM5220R01 contains a 915 MHz frequency hopper and operates in the 902-928 MHz range.

This equipment remote module performs communication between condensing unit/compressor or boiler and thermostat. While intended to be used in mostly residential applications, it can also be used in various light-commercial applications as well.

This is an original application for the certification of FCC ID: HS9-ERM5220R01 under FCC 15.247.

Sincerely,

Honeywell - Peter Walthers
Sr Engineer, ACS HW CoE
