## Overview

The TH8732WF is a WIFI enabled thermostat operating in the 2.4GHz ISM band utilizing the popular 802.11b/g/n standard data rates and modulations. This thermostat is designed to control various HVAC equipment. While this thermostat is intended to be used in mostly residential applications, it can also be used in various light-commercial applications as well.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

Short term confidentiality requested.

## Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
