

Antenna Description

The product uses two PCB monopole antennas that have been measured to have the following parameters.

Antenna	Frequency Range [Mhz]	Max Gain [dBi]	Efficiency [%] / [dB]	Return Loss min. [dB]	Impedance [Ω]
A	902-928Mhz	1.5	69.68/-1.55	-18.0	50
B	902-928Mhz	3.25	79.75/-0.98	-27	50
