The THM5421R02 is a Redlink enabled Equipment Interface Module operating in the 902-926MHz ISM band utilizing a frequency hopping algorithm. This device is designed to provide connections to various HVAC equipment. While this device is intended to be used in mostly residential applications, it can also be used in various light-commercial applications as well.

This is an original application for the certification of FCC ID: HS9-THM5421R02 under FCC 15.247.

Sincerely,

Alan D. Bredon
