### Declaration of Conformity

#### FCC Compliance

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- \* Reorient or relocate the receiving antenna.
- \* Increase the separation between the equipment and the receiver.
- \* Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- \* Consult the dealer or an experienced radio/television technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

#### Recommended Cable Types

Recommended cable types for the network cabling are (as defined by ISO/IEC DIS 11801):

Shielded Twisted-Pair (STP): Type 1A

Unshielded Twisted-Pair (UTP): Category 5.

Conformance with FCC Class B requires use of shielded cabling, which may be either STP or S-UTP.

#### Modifications

If the device is changed or modified without the express approval of Olicom A/S the user may void his or her authority to operate the equipment.
