Re: FCC ID: HSW-2410G

To Whom It May Concern:

The following application is submitted on behalf of our client, RFM / Cirronet Inc., for evaluation of their model WIT2410G for a class II permissive change under FCC Part 15.247. This permissive change is to address the addition of a new antenna type for the WIT2410G single modular approval.

The new antennas are as follows:

MTI Wireless Edge, Model: MT-344041/S/E, Panel Antenna 17dBi Gain

Radiated emissions for all antennas were evaluated in a stand alone configuration per single modular approval guidelines.

The WIT2410G was found to be in compliance.

Sincerely,
