

Response to TCB Findings

Can the device transmit more than 2 words in 100ms duration, in the presence of a radar signal?
Please clarify.

Per Client.

The software is designed to transmit only two words in a 100 ms period. The "third" word, begins at approximately 107.5ms after the beginning of the first.

Please specify the label materials and justify their permanence on the devices through their expected life-time.

Per client.

The console label material is Polyester. The label adhesive shall be a type, consistent with the past radar detector FCC ID labels, that is of a permanent adhesive, expected to last the lifetime of the device.
