## Declaration Letter

Date: 2012/12/06

FCC ID : HZB-MB83HP5

To Whom it may concern,

We, Proxim Wireless Corporation, declare that the EUT (Model Name: MB82HP). The firmware of EUT is only set by factory. There is no any software that can be modified by end-user or third party. There is switch on the EUT. It can switch AP or Client mode.

The communication that we use (WORP) has a clear master or slave role for each unit so it is not a Mesh network, each unit is either operating as Master (BSU) or as slave (SU), but they can be reconfigured to operate as the other and that is the reason that we submit the units for Master DFS certification. The operation is not essentially different from the AP and client operation, but can be reconfigured. It is not Mesh.
