EQUIPMENT FCC ID: I6U SMARTLP3

3. SYSTEM TEST CONFIGURATION

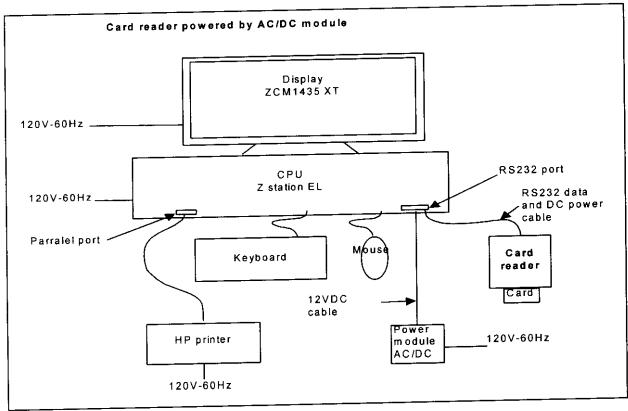

3.1 Justification

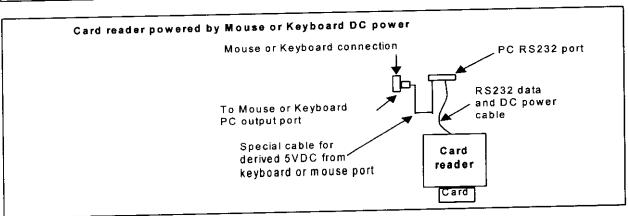

The SmarTLP3 is configured for testing in a typical fashion (as a customer would normally use it) with a host computer.

The SmarTLP3 is connected to a P.C RS232 serial port.

Personnal computer is in standard configuration: Display, keyboard, mouse, and printer The SmarTLP3 can be powered by the 5VDC derived from the P.C mouse or keyboard PS2 port, or external DC power supply, so these 3 configurations were tested for power line perturbations and field strenght measurement. (The mouse port will be used the most often to feed the SmarTLP3, because it is the most commonly found on the Personal Computers)

3.2 EUT CONFIGURATION

	T 1 1 1 1 1 1 2 1 2 2 2 2 2 2 2 2 2 2 2	Page: 7 /57
Report Number: 965-215-21/e	Test date: August 11 and 12, 1998	rageri
Report Number, 700 210 21/6		

EQUIPMENT FCC ID: I6U SMARTLP3

3.3 EUT exciser software

A card for test SCOT50 is introduced in the reader. A software test runs to read the datas on the card and waits for the answer to verify the datas. The test is looped back to run indefinitely. The results of verification is displayed by PC.

3.4 Required Signatures

Applicant Signature:

Typed/printed Name:

Date 09/18/98

Position: Compliance Center Director

Test Lab. manager Signature

JL. CANDELON Typed/printed Name:

Date: 9/18/98

Position: Lab. manager

Staff test

Test Signature:

Date 09/18/1993

Typed/printed Name: D.RAUD
