Attention: Authorization and Evaluation Division

Subject: RFI related modifications incorporated into unit COLOR MONITOR  
with - FCC ID: I84AS1795

Dear Sirs:

This letter serves as our declaration that all modifications listed below were implemented in the sample submitted for testing. We further declare that the same modifications will be implemented into all production units to enhance compliance of the units to FCC limits.

The modifications include the following:

1. Added three ferrite cores on the signal cable - one outside and two inside the monitor. (see photo 2 & 6)
2. Added a metal cover on the rear side of CRT board and it was connected to chassis by five ground wires. (see photo 4 & 5)
3. Added a ferrite core on the double focus wires with one turn. (see photo 6)
4. Added a ferrite core on the G2 wire with one turn. (see photo 6)
5. Added a ferrite core on the wires from the signal cable to the main board with one turn. (see photo 6)
6. Added a ferrite core on the wires connecting CRT board and main board with two turns. (see photo 7)
7. Added a ferrite core on the wires connecting CRT board and main board with one turn. (see photo 7)
8. Added a ferrite core on the safety ground wire with four turns. (see photo 7)
9. Added three capacitors and two resistors on the solder side of main board for electrical improvement only not for EMI. They will be built into the component side after circuit re-layout. (see photo 10)
10. Added four capacitors, one resistor and seven jump wires to the solder side of the CRT board for electrical improvement only not for EMI. They will be built into the component side after circuit re-layout. (see photo 12)

If you have any further questions or comments regarding the above, please don't hesitate to contact Mr. Mike Su of ADT Lab. at fax No.:886-2-2602-2943 or  
E-mail: [mike@mail.adt.com.tw](mailto:mike@mail.adt.com.tw)

Sincerely yours,

*Kao - Wan Lee*
