

Description of Permissive Change

The application is prepared for FCC class II permissive change by adding frequency band and VHT/HE160 MHz modes through software enabling to its original parent application. The added frequency band is from 5.26 to 5.32GHz, 5.50 to 5.72GHz. Also corrected a typo for antenna cable length.

Both devices, original and updated versions, are electrically identical in all aspects except for the software changes described above.

Regards,
