

**I9Q-ATI23GGZSC REQUEST FOR NOTIFICATION**

**EXHIBIT 3 - WRITTEN INFORMATION PER FCC RULE PART 2.975**

**DESCRIPTION OF EQUIPMENT TESTED AND COMMENTS**

The I9Q-ATI23GGZSC is a tower mounted RF section that interfaces with a ground mounted baseband unit. An Aluminum housing with NEMA 4X rating serves as the chassis for major components.

The main interface to the unit is a Type "N" connector which connects the baseband unit to the I9Q-ATI23GGZSC.

The case seal, and drain holes were the main source of case radiated emissions. These emissions are below FCC specification, for parts 2, 74 & 101.
