### Presenter 2.4 Description of Operation

The Presenter 2.4 is a hand held remote control device and receiver for use with PC based computers. The remote operates in the 2.4GHz ISM band and uses Manchester encoded FSK modulation. The remote consists of 6 push buttons and a mouse, which are mainly intended to control a Power Point presentation. Two of the buttons also serve as left and right mouse clicks. The most typical application is for controlling a PowerPoint presentation with a digital projection system.
