Andrew Bachler, Principal Staff Engineer
Motorola Mobile Device Business
Libertyville, Illinois

Question and response follow:

Please provide justification that the specific armband accessory for this filing complies with the "Data Operation" statement specified in the response to #2.

Response: The armband provides a convenient and secure carrying method for the phone during an "active lifestyle" situation. While this body worn device supports hands free voice mode, with an additional Bluetooth accessory; data operation is not a recommended mode while the phone is positioned in the armband. When using the data operation mode feature, the phone is removed from the armband so the user interface is assessable, and the user is instructed to maintain a 1 inch body separation distance.
