Supplement to SAR Test Report for Motorola portable cellular phone (FCC ID IHDP56KC1)

Prepared by:

Thomas Knipple

Motorola Mobile Devices Product Safety Laboratory

Libertyville, Illinois

Summary of FCC request for additional information

There was a request for additional information regarding Motorola’s SAR Test Report for Motorola portable cellular phone (FCC ID IHDP56KC1). The requested information is addressed below in the same numbering sequence received.

Question:

4. Please justify that 802.11g powers do not need to be evaluated for SAR.

Response:

4. The following conducted power measurements show that 802.11g mode operates at a lower power level than the 802.11b mode tested for SAR compliance, and therefore does not require testing.

Channel	802.11b Power (dB)	802.11g Power (dB)
Channel 1	17.95	17.27
Channel 6	17.87	17.19
Channel 11	17.33	16.93
