

MOTOROLA

Date: Aug 11, 2009

Subject: Request for additional information regarding FCC ID: IHDP56KC1

Reference:

Correspondence Reference Number: IHD90934
Confirmation Number: 907200892-3
Date of Original Email: Aug 7, 2009

Prepared by:

Andrew Bachler, Principal Staff Engineer
Motorola Mobile Device Business
Libertyville, Illinois 60048

Questions and responses follow:

1. Please move the HAC key features letter into the attestation statements, or please provide a statement justifying why the key features are held in the operational description exhibit / permanent confidential.

Response: Due to product security "leaks" on the internet, we would like confidentiality on the HAC statement. This exhibit includes official model number and feature data which confirms information available on the internet through other sources. We request STC on the HAC statement, and per agreement with the TCB, will submit it as an exhibit 8.

2. Internal photographs appear to be missing photos. Please include missing photographs.

Response: Please refer to the revised internal photos Exhibit 9 submitted online.

3. Please supply an overlay with the final measurement locations for the telecoil measurements in Exhibit 7B.

Response: Please refer to the revised Exhibit 7B submitted online.

4. Please justify that 802.11g powers do not need to be evaluated for SAR.

Response: Please refer to the SAR report supplemental response submitted online.

5. Calculations made in Table 5 of Exhibit 11 do not appear to be calculated correctly. Please update showing calculations per KDB 450824.

Response: Please refer to the revised SAR report submitted online. Also note that the highest SAR value for the "head" configuration has been updated, so the SAR date in the user's manual is updated accordingly. The body SAR value in the user manual does not change. Please refer to the revised user's manual submitted online as well.
