Attestation Statement

Federal Communications Commission
Authorization and Evaluation Division
7435 Oakland Mills Road
Columbia, Maryland 21046

Reference: (Pre PBA Tracking Number 294775)

This is in response to your request of October 5, 2010, for Motorola's confirmation of subsequent steps regarding the grant of FCC ID: IHDP56LC4 and future filings using TCB's.

Motorola confirms that TCB filings must use the appropriate manufacturer calibrated certificates per FCC KDB pub 450824.* Motorola further confirms with regard to the grant of FCC ID: IHDP56LC4 that supplemental (not replacement) data comprising system check and results for purposes of confirming the correctness of the original data will be submitted to the TCB within two weeks from the grant date and that the supplemental data will be taken as follows: utilizing manufacturer certificated dipole antennas with SAR results repeating the highest SAR configurations for each transmit mode and any configurations with SAR higher than 1.5 W/kg.

Regards,

Andrew J. Bachler
FCC Liaison
Motorola Mobility, Inc.
600 N. U.S. Highway 45
Libertyville, IL 60048-5343

* Note that Motorola maintains that its alternate calibration methodology conforms to the requirements of the KDB, which does not reference a requirement that calibration be done by the manufacturer. Nevertheless, for subsequent filings, Motorola will submit data utilizing manufacturer-calibrated dipoles.
