Hello Andy,

Thank you for your email. In the response to RT question #3, it was mentioned that Bluetooth average power levels were used to determine SAR test requirements. Please provide Bluetooth average conducted power measurements in the SAR test report to support Bluetooth SAR test exclusion.

The item indicated above must be submitted before processing can continue on the above referenced application.

Response: The conducted power levels are provided in section 8.4 (p. 20 of 59) of the Exhibit 11 SAR test report.

Sincerely,

Gregory Czumak
