Exposure to RF energy & phone operation. Your phone contains a transmitter and receiver of RF energy. It is designed to comply with regulatory requirements concerning human RF exposure. For optimal phone performance, and to stay within the RF exposure guidelines:

- Hold your phone normally at your ear when talking on it.
- When using the phone next to your body (other than in your hand or against your head), maintain a distance of 5 mm from your body to be consistent with how the phone is tested for compliance with RF exposure requirements.
- If you use your phone with a non-Motorola accessory case or holder, make sure the accessory maintains the required separation distance and has no metallic parts.

Note: In accordance with French regulations, the following are precautionary recommendations only. No danger associated with the use of a mobile phone has been observed.

You can limit your exposure to radio-frequency energy:

- By using your phone in areas with good network reception conditions (for example: display shows four or five bars). Other areas may have poor reception, such as an underground car park, when traveling by train or car, etc.
- By using a hands-free kit to keep your phone away from your head and body. In this latter case, pregnant women are advised to keep their phone away from their abdomen. It is also recommended that adolescents keep their phones away from the lower part of their abdomen.
- By making reasonable use of mobile phones by children and adolescents, for example by avoiding night time communications and limiting the frequency and duration of calls.

This warranty only applies to the first purchaser, and begins on the original date of purchase by such first purchaser. In Latin America, any remaining warranty applies to resold products, except resold products that were refurbished, or repaired by an unauthorized service center.

Repairs made by Motorola or its authorized service center under this Limited Warranty ("Warranty Service") are covered for the balance of the original Warranty Period, or for the period noted in the Addendum, whichever is longer. This Limited Warranty covers only a purchase of new Products from Motorola or an authorized reseller or authorized distributor of Motorola Products which are accompanied in-box by this written Limited Warranty. This Limited Warranty is

Repaired or replaced products will be returned to you in their original factory configuration, plus any applicable software updates, which may affect use and/or compatibility with third party applications (for which Motorola shall have no liability). Any refunded or replaced Product shall become the property of Motorola. To obtain service under this Limited Warranty, the claim should be made in the country where the Product was intended for sale; otherwise repair services are limited to the options available in the country where the service is requested.

What is not covered?

Chargers that do not comply with these standards may be unsafe, and may cause slow charging, product damage, or reduced device performance.

Distractions

Using your mobile device in some circumstances could distract you and may cause a dangerous situation. Be aware of your surroundings and environmental hazards when using your mobile device.

Warning about high volume usage

Exposure to loud noise from any source for extended periods of time may damage your hearing. The louder the sound, the less time is required before your hearing could be damaged.

To protect your hearing:

- Limit the amount of time you use headsets or headphones at high volume.
- Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can't hear people speaking near you.

If you experience hearing discomfort, including the sensation of pressure or fullness in your ears, ringing in your ears, or muffled speech, you should stop listening to the device through your headset or headphones and have your hearing checked.

Driving precautions

Take care when using a mobile device or accessory while driving a vehicle. Always prioritize your safety and the safety of others. Follow the law. Local laws and regulations may govern how you can use mobile devices while driving.

In areas where laws allow using mobile devices while driving:

- Keep your eyes on the road.
- Enter destination information into a navigation device before driving.
- Use a handsfree device if appropriate or required by law in your area.
- Use voice activated features (such as voice dial) and speaking features (such as audible directions) if appropriate and as required by law in your area.
- Concentrate on driving, and stop using the device if you can't concentrate. Pull over safely before using your mobile device to send messages, surf the web, or use other apps.

In areas where laws prohibit using mobile devices while driving, don't use your mobile device while driving, including the following tasks:

- Never make or answer calls.
- Never type, read, enter or review texts, emails, or any other written data.
- Never input navigation information while driving.

DONE

Seizures, blackouts, eyestrain & discomfort

Prolonged use of any device may cause discomfort in hands, fingers, arms, neck, and other parts of your body, and may cause eyestrain and headaches. It is good practice to use your device in a safe area with comfortable ambient lighting, and take frequent breaks if you feel discomfort. Seek medical advice if symptoms persist.

In rare cases, flashing patterns or lights, for example in video games or movies, may cause seizures or blackouts. If you suffer any seizures or blackouts, or have a history of seizures, stop using your device and seek medical advice.

Medical devices

If you use an implantable pacemaker or defibrillator, or other medical device, consult your healthcare provider and the device manufacturer's directions before using this mobile device.

If you use a pacemaker or defibrillator the FCC recommends that you observe the following precautions:

- ALWAYS keep the mobile device more than 20 centimeters (8 inches) from the pacemaker or defibrillator.
- Use the ear furthest from the pacemaker or defibrillator to minimize the potential for interference.
- Turn OFF the mobile device immediately if you have any reason to suspect that interference is taking place.

Important

Some products contain magnets. Always keep products with magnets more than 20 cm. (8 in.) from medical devices, such as pacemakers, internal cardio defibrillators or other devices that can be affected by a magnetic field. Also, keep away from credit cards, ID cards and other media that use magnetically encoded information.

LED light safety

For products with an LED light source, avoid looking directly at the LED, which may cause discomfort or temporarily impair vision.

Children and animals

Keep your mobile device and its accessories away from small children and animals. These products are not toys and may be hazardous to small children and animals. For example, a choking hazard may exist for small, detachable parts. Keep plastic bags away from babies and children to avoid danger of suffocation and choking.

Supervise access. If children use your mobile device and accessories, monitor their access for their safety, to limit excessive use, and to help prevent loss of data or unexpected charges for data or application purchases.

Glass parts

Some parts of your mobile device, like your screen, could be made of glass. If the glass breaks, chips, or cracks, do not touch or attempt to remove it. Stop using your mobile device until it can be repaired by a qualified service center.
