Summary of FCC request for additional information

There was a request for additional information regarding Motorola portable cellular phone (FCC ID IHDT56CD1). The requested information is addressed below in the same numbering sequence received.

Please detail how the speaker phone mode could be used in a portable configuration. Is the phone expected to be used in a "held to face" position? If so please provide SAR data for this position.

Response: Normal speaker phone mode would remotely locate the unit away from any individual (for example, on a table or desk). No "hand-held" position is expected in speaker mode operation.
