Questions and responses follow:

1. Please confirm that the following are typos:

(a) p.8 of the SAR report- the 1900 MHz GSM body worn configuration, back of the phone to the phantom: the SAR plot lists the value as 0.458, while p.8 lists it as 0.485.
This affects the extrapolated value, which will be placed on the grant.

(b) p.5 of the SAR report: based on the SAR plot, the validation test results for 900 MHz (3/1/05) should be 11.18, and not 11.16.

Response: Please refer to the supplemental SAR report submitted on 3-16-05.
