

**MOTOROLA**

**Date:** August 30, 2006

**Subject:** Request for additional information regarding FCC ID: IHDT56FB1 (Portable GSM transceiver)

**Reference:**

Correspondence Reference Number: IHD0461  
Confirmation Number: 160807  
Date of Original Email: August 24, 2006

**Questions and responses follow:**

1. Please submit 1900 MHz GPRS body SAR data.

**Response:** Motorola tests GPRS body worn SAR data at a distance of 25 mm. Since the distance provided by the SYN1697A Arm Band Case accessory is substantially less than 25 mm in the GSM mode, the GPRS values at the greater distance are not available.

2. The cover letter submitted with the application lists an incorrect FCC ID. Please resubmit, with the correct FCC ID.

**Response:** Please refer to the corrected cover letter, submitted on August 30, 2006.

3. We note the following typo: on p.3/40 of the SAR report, the table lists the GSM800 (U.S. Cellular) frequency band in the GSM900 column.

**Response:** Please refer to the corrected SAR report, submitted on August 30, 2006

**Prepared by:**

Andrew Bachler, Principal Staff Engineer  
Motorola Mobile Device Business
