Supplement to SAR Test Report for Motorola portable cellular phone (FCC ID IHDT56GL1)

Prepared by:

Katerina Royzen

Motorola Mobile Devices Product Safety Laboratory

Libertyville, Illinois

Summary of FCC request for additional information

There was a request for additional information regarding Motorola's SAR Test Report for Motorola portable cellular phone (FCC ID IHDT56GL1). The requested information is addressed below in the same numbering sequence received.

4) Please clarify whether body-worn SAR results used accessory or air-gap - setup photo does not appear to show accessory. Please submit accessory-installed SAR results where appropriate.

Response:

The Body worn testing includes both air-gap and CHYN4647A accessory. The SAR results with CHYN4647A accessory are given in Table 9 of Section 6.2. All other tables in section 6.2 are with air-gap.

This is an additional photo which shows the CHYN4647A setup:
