Re: FCC ID IHDT56GL1  
Applicant: Motorola, Inc.  
Correspondence Reference Number: 30975  
731 Confirmation Number: EA870551

**Questions and responses follow:**

1. Per 47 CFR 2.1033 (b)(7) and (c)(12), and in support of RF exposure evaluation, please submit internal photos illustrating chassis and housing assembly, also indicating antenna locations relative to chassis and housing.

**RESPONSE:**

Please see attached Exhibit 9A (pdf file).

2. FYI-only no-response requested: SAR report lists 10g SAR and "ICNIRP limit" - for the record we note that if these results used averaging over 10g in the shape of cube, these follow an EU/CENELEC (ref. [2]) procedure not ICNIRP. We note also these 10g-avg SAR results are not relevant for FCC RF exposure compliance demonstration.

**RESPONSE:**

N/A – FYI note only.

3. If not in filing already, what is GPRS mobile station class (A, B, C) - if class A please submit multislot-operation SAR data for head positions.

**RESPONSE:**

The phone is GPRS mobile station Class B.

4. Please clarify whether body-worn SAR results used accessory or air-gap - setup photo does not appear to show accessory. Please submit accessory-installed SAR results where appropriate.

**RESPONSE:**

Please see the attached supplemental SAR Report dated May 31, 2006.
