Questions and responses follow:

Refer to the Supplemental HAC report for responses.

1. Please provide ABM2 investigation for the 3G modes for Section 6 of the T-coil Report per July 2006 FCC guidance. It is unclear which 3G mode was used for the tests.

Response: For T-coil compliance evaluation, RC1 S03 is used. This RC1 S03 is used for measurements in Table 5 (page 8) and Table 6 (page 9). As per the recent presentation by Qualcomm to the FCC on March 15, 2007, RC1 S03 combination represents the appropriate configuration for T-coil testing.

Please refer to the ATIS filing which includes Qualcomm's presentation. This filing can be found at:
