Subject: Request for additional information regarding FCC ID: IHDT56HC1

Reference:

FCC Correspondence Reference Number: 35978
731 Confirmation Number: TC249651
Date of Original Email: February 8, 2007

Prepared by:

Andrew Bachler, Principal Staff Engineer
Motorola Mobile Device Business
Libertyville, Illinois

1. Test Report 6A3 Supplemental does not explain test setup for AC line conductive emissions. It is not clear what the power plug end of the EUT is (Laptop, adapter, etc).

Response: The EUT is powered via an internal battery. The EUT is connected to the Laptop through a USB data cable. The EUT does receive some power from the Laptop through the data cable that is used to charge the internal battery.

2. Exhibit "Test report 6A2 UL" of application 259651-JBP is the same exhibit in application 445315-DSS. This should be removed from application 259651.

Response: No action / response necessary on Motorola's part.
