

## ATTESTATION STATEMENT

This device contains an embedded Bluetooth device that Motorola confirms compliance with the following Part 15 regulations.

**15.247(a)(1)**

- the hopping sequence must be pseudorandom
- all Channels are used equally on average
- the receiver input bandwidth is approximately equal to the transmit bandwidth
- the receiver hops in sequence with the transmitted signal

**15.247(g)**

the system is designed to comply with all of the regulations in Section 15.247 when the transmitter is presented with a continuous data (or information)

**15.247(h)**

the system does not coordinate its channel selection/hopping sequence with other frequency hopping systems for the express purpose of avoiding the simultaneous occupancy of individual hopping frequencies by multiple transmitters
