Subject: Request for additional information regarding FCC ID: IHDT56HW2

Reference:

Correspondence Reference Number: IHD7083
Confirmation Number: 702070083-85
Date of Original Email: February 9, 2007

Prepared by:

Andrew Bachler, Principal Staff Engineer
Motorola Mobile Device Business
Libertyville, Illinois

1. Several items in the Part 22/24 EMC, Part 15B and Part 15C test reports are listed as past their cal due dates. Please address.

Response: All testing was performed using equipment that was within calibration at the time that the test was performed. No equipment listed in the equipment table was used after the specified calibration due date. If, during the course of product testing, a piece of equipment went out of calibration and that piece of equipment was needed to complete product testing, a similar piece of calibrated equipment was substituted. If a substitution was made, that new piece of equipment would be listed in the equipment table along with the piece that was removed from service.

2. Please verify that the measured ERP of 850 EDGE is more than 10 dB lower than the measured 850 GSM ERP.

Response: The 850 EDGE ERP data in the report accurately reflects the measurement results.

3. Please provide a copy of the ISO/IEC 17025 Accreditation for the test labs used to perform testing on the EUT (including EMC (Parts 22/24 and 15) and SAR). These accreditations do not appear to be available on the A2LA website.

Response: The copy can be found at the following link. Please copy and paste into your web browser. <http://www.a2la.org/scopepdf/2518-02.pdf>
